Infantry and envalry organizations exist, and it is reported a number of pieces of artillery have been sent to the city. And these bodies, organized and armed without authority and in violation of law, assume to be guardians of the peace. This is a political controversy. One side, the Democrats, represented by whites, say they fear frauds on the part of their opponents. The Republicans, consisting mainly of blacks, claim they fear frauds and also violence on the part of the Democrats. At one time a collision and bloodshed was feared by all ; now by the Republicans. But by the Democrats have become meaters of the situapresence of troops at this time, of course, and of this lamentable state of affairs it is now useless to speak. I only seek peace and protection to all. Can there be any serious objections why troops should not be sent there? No harm can result, for troops are in many of our cities at this moment, and in two of the cities in this State. Their presence may do great good. It may save many lives ; even one would more than compensate for the harm which, if any, might result. I do
